^cAddress, Email Address

The 2019 ACA Annual Meeting is set to be an amazing experience for everyone involved, session chairs, attendees and exhibitors. The annual meeting offers a great opportunity to everyone who wants to get involved in the ACA or crystallography.

Whether your work is selected as a lecture or poster you will have the opportunity to mingle with over five hundred devoted crystallographers who come from all backgrounds. Giving a lecture or poster offers a unique opportunity to present to every level of scientist.

Remember the reader and make sure to use a readable font which is of a reasonable size (the most legible fonts are Arial, Courier and Verdana, at 11-point size). Feel free to include tables, diagrams (Fig. 1), charts and illustrations, and don't forget your references [1,2]. Double check your PDF to make sure it has a title, the list of authors, and their affiliations and contact information.

Fig. 1. The ACA2019 meeting logo.
